CONVERGENCE OF NANO-ENGINEERED DEVICES FOR ENVIRONMENTAL AND SUSTAINABLE APPLICATIONS

UC Merced + LLNL

## Science and Engineering of Environmental Sensors Research Incubator

May 31 – June 21, 2022

### NANO MATERIALS FOR ENVIRONMENTAL SENSING

Graduate students eager to reach across disciplinary boundaries and ready to team up with like-minded scientists and engineers to develop novel sensors for environmental applications are invited to apply to a hands-on **3-week summer program**

Every participant will have the opportunity to:

- *work with UC Merced faculty and Lawrence Livermore researchers*
- *receive a minimum of \$1000 in research travel funds*
- *learn about application of novel nano-sensors in soil, water and air*

All PhD students are eligible to apply.

Questions? Email us: [ucmcondesa@ucmerced.edu](mailto:ucmcondesa@ucmerced.edu)

**Applications open now through March 20, 2022**
